

# Meteo

## Richiedere chiave API

Per richiedere una chiave API per il meteo è necessario accedere al servizio: [World Weather Online](#)

Una volta fatto accesso, è necessario iscriversi al servizio premendo il pulsante indicato qua sotto:

The screenshot shows the World Weather Online website. The header includes the logo and a navigation bar with links: My Account, APIs, Pricing, Getting started, Docs, API explorer, Terms, and Contact. The main content area is divided into three columns. The first column, titled 'FREE API', lists various API services and their features. The second column, titled 'PREMIUM API', lists similar services but with more extensive features. The third column, titled 'GET STARTED', provides links to various resources. At the bottom of the 'FREE API' column, a button labeled 'SIGN UP NOW FOR FREE' is circled in red. Below the 'FREE API' and 'PREMIUM API' columns are buttons for 'TRY FREE FOR 60 DAYS' and 'PRICING'. At the bottom right, there are social media links for Twitter, Facebook, and Google+.

## Il meteo mostra risultati di un'altra città

Quando questo avviene, è possibile specificare nella località del meteo anche lo Stato in cui è presente la città. Per specificare lo Stato della città è sufficiente usare la “virgola” come separatore. Esempio:

Torino,Italy
